# Under the Hood of Machine Learning - The Basics

Credit: Ulf Änggård

Under the Hood of Machine Learning - The Basics

In this course, we will explore Machine Learning and Neural Networks in particular. The objective is to reveal the simplicity at the core and cut through the jargon. Among other things, we will go deep into: What are Neural Networks and how are they trained? How do Neural Networks analyze images and text? How important is data? We will go under the

hood to let you gain an intuition in the capabilities and constraints of this powerful toolbox.
