

Lägg till resurser i kurs - Add resources in course

1.

Curriculum

Manage content delivered to students

[Preview Course as Instructor](#) 

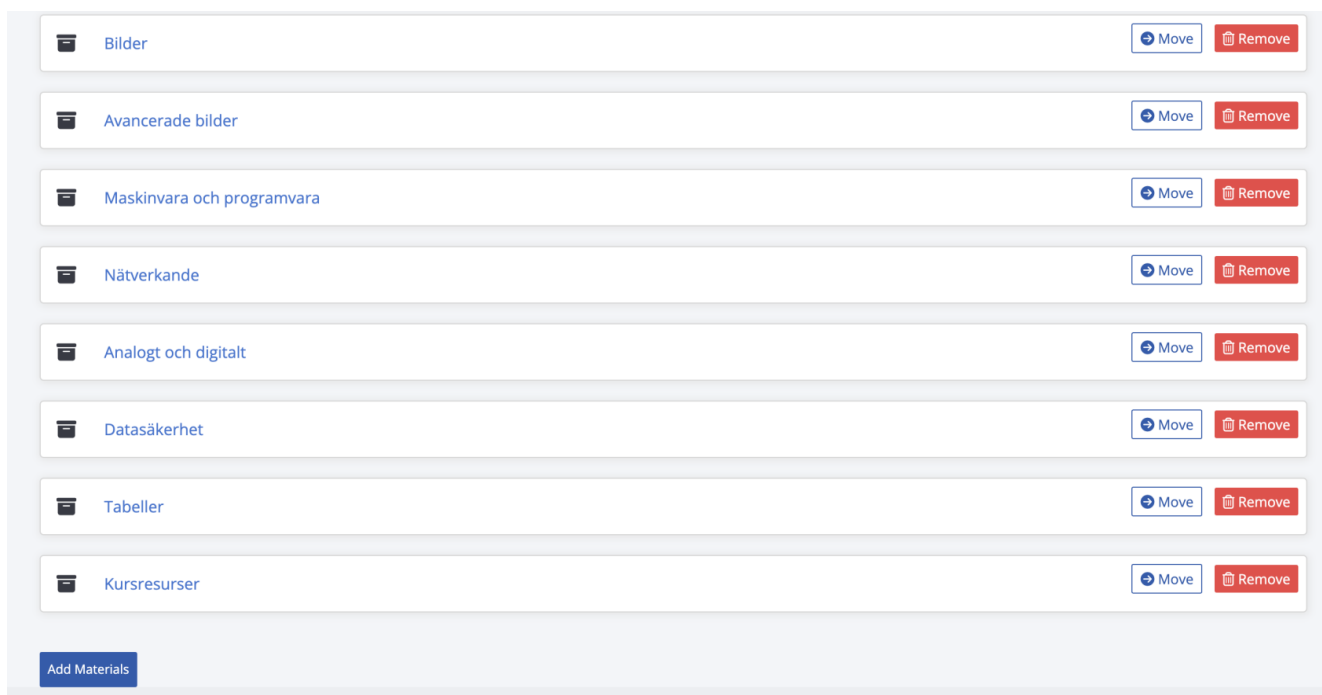

[Customize Content](#)

[Scheduling](#)

[Advanced Gating and Scheduling](#)

[Manage Source Materials](#) **1 available**

2. Press "Add Materials, Materials can be either internal or external components of a module.

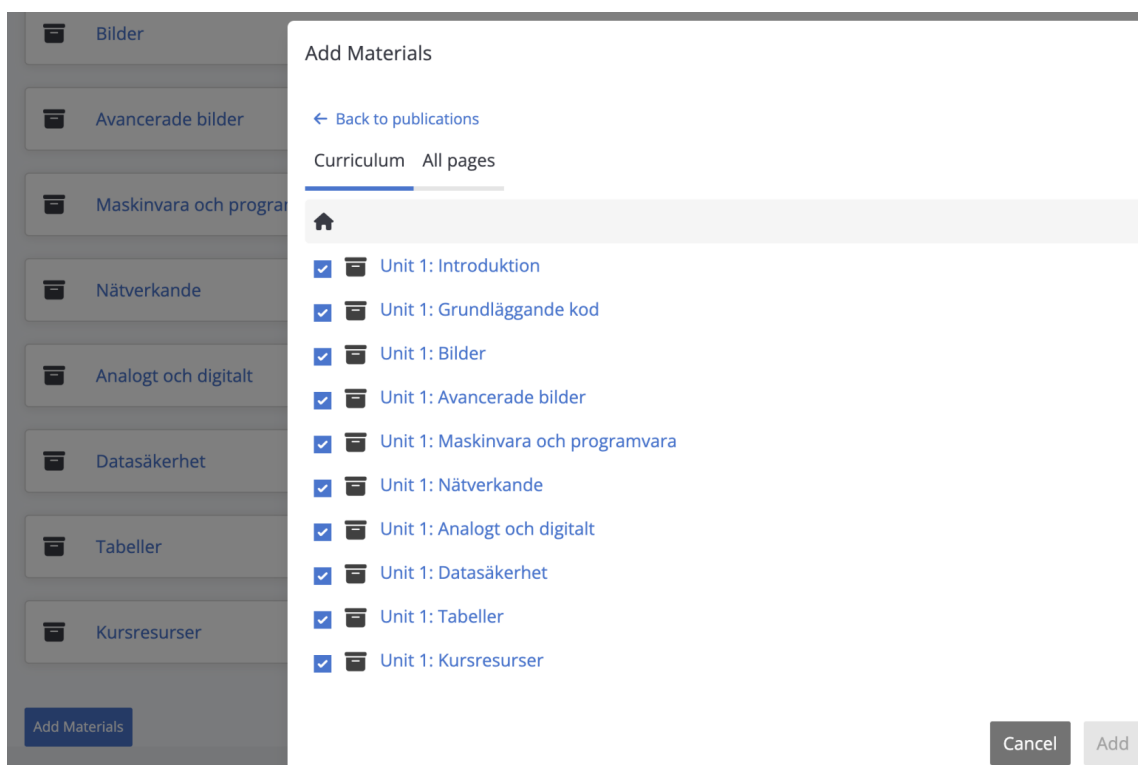

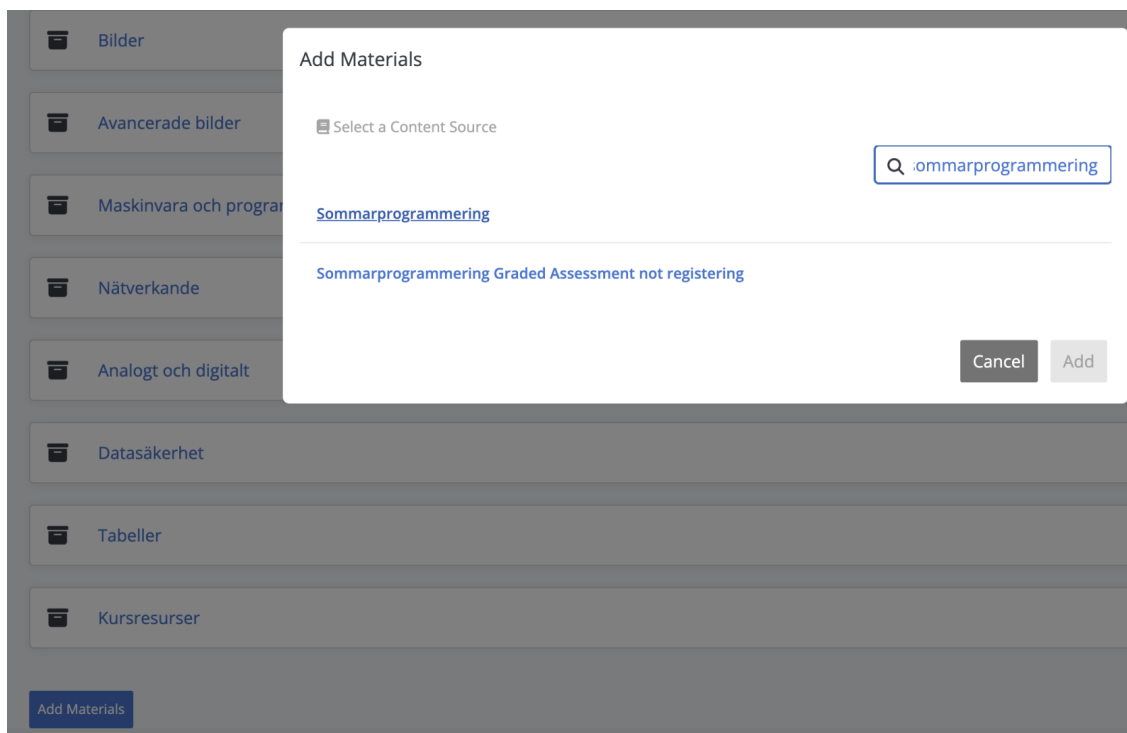

The screenshot displays a list of course modules in a table-like format. Each row represents a module and includes a folder icon, the module name, and two action buttons: 'Move' and 'Remove'.

Module Name	Move	Remove
Bilder		
Avancerade bilder		
Maskinvara och programvara		
Nätverkande		
Analogt och digitalt		
Datasäkerhet		
Tabeller		
Kursresurser		

At the bottom left of the interface is a blue button labeled "Add Materials".

3. Choose the relevant course and add the material.

4. Now press save. Note: Students can now access this material. To restrict access again, you can either remove it immediately or schedule a future visibility date. To schedule a future visibility date please refer to: [Hide sub-moment in course with Gating/Scheduling](#)
